Education

National Institute of Technology, Calicut

B.Tech in Computer Science & Engineering

2022 - 2026

7.43 CGPA

Technical Skills

Languages: JavaScript/TypeScript, Python, Java, C++, C

Technologies: NEXT.js, Django, FastAPI, Express.js, Micronaut, Strapi, TailwindCSS, PostgreSQL

Tools: Codex, Cursor, Claude Code, Docker, GitHub Actions (CI/CD), Git, Postman, Linux

Work Experience

Oracle

May 2025 – Jul 2025

Project Intern

Onsite – Bangalore

- Developed MDS assessment integrations using compliant Terra **React** components with **Redux Toolkit** state management to streamline data visualization for long-term care facilities.
- Automated digitization of Care Area Assessment (CAA) workflows for 20+ trigger types using **template-driven architecture**, reducing manual configuration overhead in proprietary healthcare infrastructure.

Pentadots

Jul 2025 – Jan 2026

SDE Consultant

Remote

- Architected scalable web platform for Doha Industrial and Engineering Services using **Next.js** and Strapi headless CMS, implementing server-side rendering and incremental static regeneration for enhanced content delivery.
- Deployed 3D product visualization system with Three.js achieving 60fps rendering performance, integrated **Mux CDN** for adaptive video streaming, reducing initial load time by 38% while maintaining visual fidelity.
- Built admin CMS workflows and CI/CD deployment automation in agile subcontracting role, delivering production infrastructure with automated testing and continuous deployment pipelines.

Apvin Labs

Dec 2024 – Feb 2025

SDE Intern

Remote

- Engineered subscription management dashboard for B2B telemedicine platform serving 14+ partner hospitals, implementing payment status tracking, patient assignment, and role-based access control using **React**, **Redux**, **Node.js**, and **MongoDB**.
- Designed and integrated RESTful APIs for managing doctor subscriptions and patient records, enabling clinic admins to track payment status and assign 150+ patients across multiple healthcare providers.

Projects

SFC Orchestration Simulator for LEO Satellite Networks

- Co-authored undergraduate research on **NFV orchestration** for LEO satellite networks, achieving 9.58% energy reduction and 77% service acceptance under carrier-grade latency constraints (<100 ms) through optimized VNF placement strategies.
- Implemented end-to-end simulation and analysis framework using **Python**, **NetworkX**, **NumPy**, **Docker** and **Firestore** to model 960-satellite constellation, automating benchmarking pipelines that processed 1,500+ service requests & analysed results.
- Created resource-aware VNF migration algorithms reducing overhead by 40% while maintaining strict QoS constraints, benchmarked against 4 competing strategies to optimize compute utilization in dynamic network environments

SiteSense (Hackathon Project) — Next.js, FastAPI, YOLO, FFmpeg, WebSocket

[Source Code](#)

- Won **1st Runner-Up** and **AI Wizard Award** at State Level TechPulse Hackathon for the project.
- Built real-time worksite monitoring system with **YOLO-based computer vision** processing **RTSP** video streams for automated attendance tracking and safety anomaly detection using **Next.js**, FastAPI REST API, and **FFmpeg**.
- Designed scalable backend with FastAPI powered REST API featuring RBAC, integrated Next.js frontend with real-time **WebSocket** updates for live monitoring dashboards.

Positions Of Responsibility

Frontend Head — Ragam'26

- Led cross-functional team of 8 developers to architect and deploy festival platform (Next.js, TypeScript), serving **20,000+ concurrent users** with 99.7% uptime and <2s page load time, processing 5,000+ ticket transactions worth **INR 50+ lakhs**.

Tech Head — Tathva'24

- Managed a team of 6 engineers to develop the responsive festival web application using Next.js, optimizing frontend performance to achieve a 90+ Lighthouse score, while handling 1000+ of concurrent users during peak registration traffic spikes.

Secretary — Google DSC: Lead the club team in developing projects, organizing technical workshops and other tech events.

Webmaster — NITC CSE Association : Developed and maintained CSEA websites. Organized hackathons and tech events.
